Installation Procedures for installing new IVoDS version 1.4.0

1. You need to be logged on as administrator or use an account that has administrator privileges to perform the following tasks.
2. Please uninstall your existing version of IVoDS software. Go to **S**ettings> **C**ontrol Panel> **A**dd/Remove Programs> **Select the IvoDS Self-Extraction program**.
3. Download the ivods.exe file and save to your desktop. (You will need to call the HOSC Help Desk at 256-544-5066 to obtain a one-time username/password to download this file. Please go ahead and request your NEW IVoDS password as well. Your IVoDS Username will remain the same and the VPN username/password is NOT affected.)
4. Go to your desktop and double-click on the ivods.exe icon to install the new version of IVoDS software.
5. Once the ivods.exe completes, you should have seen 2 dialog messages stating "DLLRegisterServer in ivods.dll succeeded" and "DLLRegisterServer in wprtpnet.dll succeeded". If these do not succeed, please notify the HOSC help desk at 256-544-5066 or email hsd@ums.msfc.nasa.gov and receive further instructions. You should now see an IvoDS icon (see figure 1) on your desktop. This will be used to launch IVoDS.
6. To begin using SecuRemote, Double-click on the IVoDS Gateway Icon. Enter your VPN username and password and click "OK". The VPN username/password has not changed.
7. You are now ready to run IVoDS.   Double click the IVoDS icon (see figure 1 below) located on **your** desktop and it will take you to the IVoDS browser. You will need your new IVoDS password to log into IVoDS successfully.
